

Job Name:

## **Web Developer Position**

Date: June 12, 2019

Job #: ICT0001

### **Summary**

The Winnipeg Metropolitan Region is a para-municipal regional agency serving 18 municipal members on a broad-base of initiatives from municipal land use planning to economic development and servicing. The Winnipeg Metropolitan Region is hiring a self-motivated and design-oriented web developer to maintain and improve its existing website assets as well as develop new web-based assets on a project by project basis. This is a part-time position. Salary is negotiable and based on experience.

### **Responsibilities**

- Maintain and update design/functionality of existing websites in WordPress and Joomla content management systems serving various media types;
- Collaborate with colleagues to develop new website assets as needed;
- Other duties as assigned—such as developing web-based tools on a project by project basis, organizing media, and organizing/cleaning data.

### **Qualifications**

#### *Essential Qualifications*

- Experience in building websites with HTML, CSS, JavaScript, PHP, and respective libraries and frameworks (ex. Bootstrap, jQuery, etc.);
- Experience with PHP content management system templating and design (ex. WordPress, Joomla, etc.)
- Experience using SQL and databases such as MySQL and PostgreSQL;
- Working knowledge of Git;
- Effective understanding of web security principles and techniques;
- Strong web and graphic design skills with ability to work with existing design standards;
- Excellent verbal and written communication skills.

#### *Desired Qualifications (in addition to above)*

- Proficient programming capabilities, in (preferably) Python or Ruby;
- Experience in building websites with SCSS, AJAX, Python or Ruby, and respective libraries and frameworks (ex. React, Django, Ruby on Rails, etc.);
- Experience with (preferably) Python or Ruby content management systems (Django CMS, Wagtail, Fae, Spina, etc.);
- Experience with developing interactive web maps utilizing JavaScript libraries;
- Familiarity with generating and translating XML;
- Strong database design and administration skills;

- Linux server administration skills—installing, configuring, and updating operating system, networks, software, and permissions;
- Strong understanding of server and network security principles and techniques;
- Experience developing database-driven websites and web applications.

### **How to Apply**

Please send your resume and cover letter to [ryan@wmregion.ca](mailto:ryan@wmregion.ca) by 11:59 PM (CST), June 20<sup>th</sup>, 2019.

Please be prepared to provide a sample of work (static or live) if invited for an interview. Please contact Ryan Litovitch with any questions at (204) 989-2048.
